

RFID

Proximity Membership Identification

Our RFID solutions are available in a number of convenient formats - cards, keyfobs, mobile phone stickers and wristbands, to offer your members the choice of how they wish to identify themselves.

Membership ID for Plus2 & Gladstone 360, as well as lockers, fitness login, access control and cashless payments

EASYBANDS

- Wristbands are the most versatile ID product and our EasyBand is not just functional – it's affordable, stylish, 100% waterproof and hypoallergenic.
- Available in a range of colours with a fixed-size or adjustable option, these can be customised with your logo (printed or engraved).
- We can also package EasyBand in a custom branded box for increased shelf-appeal when retailing them to members.
- All our RFID options can now be sold to members as an optional upgrade from a basic barcode or magstripe card, by simply invoking our Multiple ID functionality. And by combining RFID with our cashless module and POS systems you can increase secondary spend of your members.

RFID can facilitate Access Control, Self Service CheckIn, Cashless Payments, Locker Control and Fitness Kit login - compatible with most major brands: TechnoGym, Life Fitness, Matrix, Pulse and Precor.
